

Ekho

The ultimate solution for Operational Performance Management in the industrial sector

CLOUD-BASED | EVENT-DRIVEN | OPERATOR-FRIENDLY

Ekho is a software solution for Operational Performance Management (OPM). It delivers shared insights into production, downtime, and quality to empower companies in the industrial sector **to drive continuous improvement** and increase Overall Equipment Effectiveness (OEE).

- Speed deployment and time-to-value
- Uncover hidden performance issues
- Drive continuous improvement

ONE
SOURCE OF TRUTH IN A
COLLABORATIVE
ENVIRONMENT

EMPOWER OPERATORS TO DRIVE PERFORMANCE IMPROVEMENTS

Ekho helps your team **manage and improve production efficiency** by uncovering performance issues and empowering the shop floor to drive and measure improvement initiatives.

REAL-TIME MONITORING | LESS DATA MANIPULATION | SIMPLER AND QUICKER REPORTING

1 SHARE

Share production issues in real-time

Built for the shop floor, our software empowers operators to **uncover production issues and uncover their causes** simply and quickly.

Operators can easily categorize stoppages, helping increase data accuracy so performance analysts can quickly differentiate between planned and unplanned downtime.

2 UNCOVER

Uncover and prioritize performance issues

Intuitive dashboards and visualizations connect teams to data-driven insights, helping them **identify and prioritize issues** — and make plans for implementing improvements.

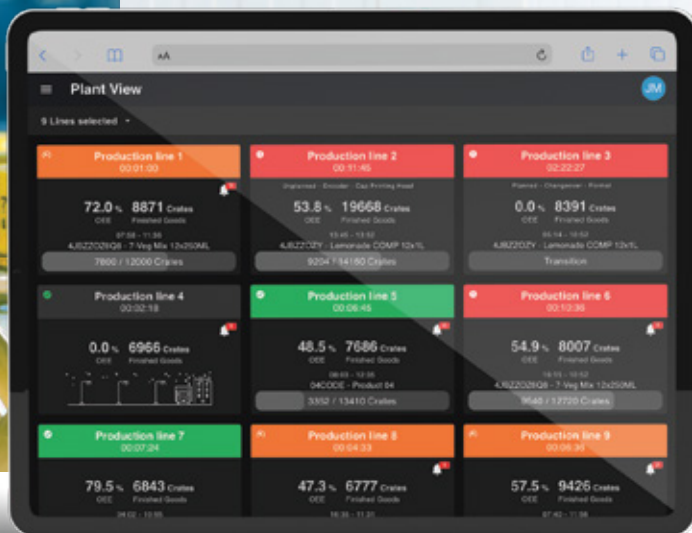

Giving all roles visibility into operations empowers teams to work together to optimize operations and increases communication and collaboration.

MORE THAN JUST DASHBOARDS

Ekho provides a collaborative environment where everyone can share information and work together towards operational efficiency.

- Reduce manual data consolidation
- Easily identify areas for improvement
- Stop allocating resources on non-issues
- Resolve problems faster
- Deploy incremental improvements
- Involve everyone

Ekho provides a single source of truth that delivers real-time performance insights and user-friendly visualizations to empower teams to work together to drive improved operational performance.

3 IMPROVE

Drive and measure improvement initiatives

Performance analysts and operators work together to **document, measure and share improvement initiatives** — fostering collaboration and highlighting team-driven successes.

Shared insights into past efforts help standardize improvements and streamline process rollout across other production lines or locations.

4 TRANSFORM

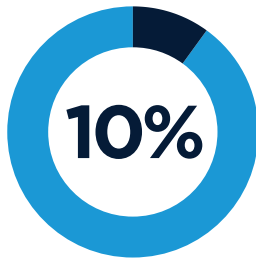

Create a culture of continuous improvement

Lay the groundwork for successful digital transformation with a **collaborative cloud-based environment** that goes beyond dashboards to connect people with the data that matters.

A single source of truth brings operators, managers, and executives together and creates a culture of accountability and continuous improvement.

FAST AND SIGNIFICANT PRODUCTION INCREASES.

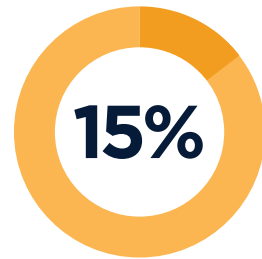

- Decrease unscheduled/
major maintenance events
- Shorten changeover times
- Minimize start-up scrap and losses
- Reduce stock-outs and line starvation
- Lower overtime costs
- Decrease delayed orders

**INCREASE
IN PRODUCTION**

**INCREASE
IN OEE**

**INCREASE
IN MACHINE UPTIME**

**EKHO IS DESIGNED
TO INCORPORATE IDEAS
FROM THE SHOP FLOOR
...AND THAT CHANGES
EVERYTHING.**
